Implementing the Computer Facilitated 5A's (CF-5A's)

21st century implementation. Image by Pixabay.

This is where the fun really starts. In these three menu sections are all the tools and materials needed to implement the CF-5A's Intervention for smoking cessation in clinics using the PhreesiaPad. To provide a comprehensive implementation flow each menu section builds on the next, starting with the larger general framework then to more detailed components.

They include
Organizational tools [1]

- A clinic's readiness assessment for implementation
- PhreesiaPad programming and testing
- Intervention training for providers and staff
- Patient and provider materials generated

Clinical tools [2]

- Patient, provider and staff resources
- Optimizing cessation therapies
- Arranging follow-ups
-
CF-5A's and Phreesia support

Administration support [3]

- Billing
- Electronic health records
- Measuring success
- Quality improvement
- Sustaining the CF-5A's
- Frequently asked questions
